

**UNCLASSIFIED**  
**NAG 14 C, ANNEX B**

**NUMERICAL CRITERIA FOR STORING COMSEC MATERIAL**

1. Select the appropriate line "Type & Quantity of COMSEC Material"
2. Proceed horizontally to the appropriate classification
3. Proceed vertically to determine the required number of storage points
4. Using the Table of Numerical Equivalents, calculate number of storage points applicable to the situation

If the value calculated in step 4 equals or exceeds that determined in step 3, the storage situation is adequate.  
If not, other security elements must be added until the required number of storage points is acquired.
